Hi! My name is Lisandro, I am a 23 year-old Software Developer currently enrolled in the 3rd year of a bachelor's degree in Computer Science and Engineering at the University of Mendoza. I'm looking for a job where a comfortable environment is of the utmost importance and teamwork along with growth are sought after. I consider myself a passionate, logical and creative person with a knack for out-of-the-box thinking and self-learning. I'm very excited to help bring ideas to life using my specific set of skills within a team of like-minded people!

experience and projects

SCRABBLEUM [UNIVERSITY PROJECT]

AUG 2023 - NOV 2023

<https://github.com/um-computacion-tm/scrabble-2023-LisandroB/>

- Scrabble clone made in Python as a college assignment.

WEB CURRICULUM [PERSONAL PROJECT]

FEB 2023

<https://lisandrob.github.io/>

- Personal web as curriculum made using JavaScript, not updated.

ROPER.COM [BOOTCAMP EXPERIENCE]

AUG 2020 - FEB 2021

<https://joaquinodz.github.io/roper/>

- I worked as a Full-Stack web developer in the production of an eCommerce app.
- We used HTML, CSS, and JavaScript for client-side interactions and/or validations.
- Back-office dashboard made in React.
- The Back-End and API were made with Node, and Express was used as an assisting framework, using MySQL for the relational database.
